Mr. Jeremy Fort  
The Service Fort  
P.O. Box 813835  
Smyrna, GA 30081

Dear Jeremy and Brad,

I want to personally thank you both for helping me over the past five years. I know that I can count on you to provide me with positive impacting solutions for my facility.

When I came to you this year and asked you to help me cut my supply budget by 20% you exceeded my cost savings expectations while increasing the quality of our products and systems.

When I then came to you and asked for a Swine Flu program for Barco you implemented sanitizing stations throughout the facility and a process to sanitize our work spaces while helping me increase workplace awareness. Your systems continue to help us reduce absenteeism and create a safer and healthier working environment.

When I came to you in 2008 and told you that corporate had issued a mandate to go Green you provided me with a list of Green Seal certified products that our facility was already in compliance with from consumables to cleaning chemicals showing my management team how proactive our facility has been from an Environmental stand point.

I like that I can call on you regardless of how big or small the request and confidently know that you have my back. I work with dozens of vendors in my position, and you two have earned my trust by being honest and following through on your promises while keeping my company's best interest in mind.

My deepest appreciation,

Earl Cormier
